MAD BULL XG01 Propane Adapter User Manual

NOTE: WEAR GOGGLE AT ALL TIMES!

There is a serious risk of personal injury, death, or property damage arising out of the use or misuse of this product. By using this product, you agree to freely accept and full assume all such risks.

Drop some silicon oil in order to lubricate your GBB Airsoft.
(Propane gas is dry and doesn't come with oil.)
Smoothly turn Clockwise to install the XG-01 adap
Do NOT cross the adapter threads!

Drop some silicon oil

When you take off XG01 from Propane tank, remember to hold tigh of both XG01 and tank. There will be small amount of gas leaking during the process.

Part#3 Internal Stem

Apply some silicon oil onto on Parts #3 (internal stem) in order to make the installation easily. There is an o-ring inside the head of propane tank. Make sure the o-ring is not defective. If the o-ring is crushed, the internal stem will have great friction during the installation.
During the installation, If you can NOT turn the XG01 all the way down to the end, please make sure the Part#3 (internal stem) is tightly fixed onto the XG01. If not, please use "No. 12 hexagon end cap wrench" to make it tight.
If there is a leaking, please check the o-ring on propane tank and the Part#3.

IMPORTANT!!

Always apply vertical force or the fill stem will be broken

(Important!! Apply vertical force onto tank only or the fill stem will be broken.)

Once this is done, the adaptor should come off the rest of the way with no trouble at all.
There is also a vent hole on the XG adapter which provides the same function.

- PRE-CAUTION**
1. Do **NOT** use this adapter near open **flame or other sources of ignition.**
